CURTIS ENGINE & EQUIPMENT RECEIVES TWO INDUSTRY AWARDS AT MTU ONSITE ENERGY NATIONAL DISTRIBUTOR CONFERENCE

**Curtis Engine was Honored for the “Most Generators Sold Nationally” and
“Achieving \$10 Million in Generator Sales”**

*Award Ceremony took place Wednesday, January 20, 2010, at the MTU Onsite Energy National
Distributor Conference in Detroit*

BALTIMORE - Curtis Engine & Equipment, Inc., a leading provider of power generation solutions in the Baltimore/Washington area and the Mid-Atlantic region's distributor of MTU Onsite Energy, received two industry awards at the MTU National Distributor Conference on Wednesday, January 20, 2010 in Detroit.

The conference and award ceremony was attended by Curtis Engine's senior management, sales and service personnel.

Curtis Engine was honored for having the “Most Generators Sold Nationally.” Paul Koch, chief operating officer, also received an award for “Achieving \$10 Million in Generator Sales.”

According to Albert Grimes, president, “We are honored to have Curtis Engine be chosen to receive these two major distributor awards within the MTU community. It is especially rewarding to have been recognized by the management of MTU, a worldwide supplier of engines and power generation equipment.”

Curtis Engine, headquartered in Baltimore, is the factory-authorized distributor within the Mid-Atlantic region for several industry leading manufacturers of power generation equipment, including MTU Onsite Energy and Waukesha Engine. In addition to providing diesel and natural gas generators and switchgear, Curtis Engine is a highly respected generator maintenance and service company serving commercial, institutional, and governmental entities for over 60 years. The Company is also a pioneer in the Landfill-Gas-To-Energy (“LFGE”) market and has been designing, building, operating, and maintaining Renewable Energy power plants for over 20 years.
